SECTION I New Concepts and Modernization of Rolling Mills

Chapter 1 A History of Minimills Producing Flat-Rolled Steel 3
John Stubbles

Chapter 2 Review of Casting and Rolling Lines with Thin- and Medium-Slab Casters 15
Vladimir B. Ginzburg

Chapter 3 Methodology and Results of Major Hot Strip Mill Modernization Projects 35
Wlodzimierz Boleslaw Filipczyk

Chapter 4 Plate Mill Upgrades for High-Strength Products 55
J. F. Evans and P. Sopp

Chapter 5 Roughing Mill Work Rolls for Hot Strip Production 63
Michael Windhager and Karl Heinz Ziehenberger

Chapter 6 High-Speed Steel Rolls: The Last Frontier in Hot Steel Rolling 71
Alberto Tremea, Angelo Biggi, Massimo Pellizzari, and Alberto Molinari

Chapter 7 Tunnel Furnace Roll Options and Energy Considerations 83
Robert J. Echlin, Daniel V. Miller, and Roman I. Pankiw

Chapter 8 Descaling of Hot-Rolled Strip 91
John B. Tiley and Per A. Munther

SECTION II Modeling of Flat Rolling Processes

Chapter 9 Modeling for Reheat Furnace Practices 99
Shaojie Chen

Chapter 10 Improvement of Schedules for Hot Rolling of Thin Wide Strips 115
Eduard Garber, Alexander Traino, and Irina Kozhevnikova

Chapter 11 Width Variation Behavior during Hot Rolling 127
Qiulin Yu

Chapter 12 Parameter Optimization and Uncertainty Quantification in Rolling 141
Arif S. Malik and Ramana V. Grandhi

Chapter 13 Simulation for the Dynamic Behavior of Strips Running on Hot Run-Out Tables 155
Yuji Ohara, Shin-ichiro Aoe, Hiromasa Hayashi, and Kazushige Ishino

Chapter 14 Laminar Flow-Cooling of Wide Heavy-Thickness Strip in a Hot Rolling Mill 161
Qiulin Yu

Chapter 15 Consideration of Microstructure Evolution in Hot Strip Mill Automation 171
Hans-Ulrich Löffler, Klaus Weinzierl, and Rüdiger Döll

Chapter 16 Novel Mathematical Models for Cold-Rolling Process 179
Eduard Garber, Alexander Traino, and Irina Kozhevnikova

Chapter 17 Elastohydrodynamic Lubrication of Cold-Rolling Lubricants and Its Mechanism in Nonconformal Rolling Contacts 191
Ian Burton

SECTION III Measurement, Automation, and Process Control

Chapter 18 Multivariable Hot Strip Mill Control 209
Gerald Hearns, T. Bilkhu, and Peter Reeve

Chapter 19 Finishing Mill Predictive Temperature Control 219
Gerald Hearns, Chris Fryer, and Peter Reeve

Chapter 20 Digital Visual Inspection of Coils 229
Mohammad B. Assar, Larry Romanauski, Matt Kremer, Margaret Krolikowski, Joe Franklin, Mike L. Elliott, and Randy A. Stankie

Chapter 21 Yield Improvement through Better Crop Optimization 239
Robert L. Ricciatti

Chapter 22 State-of-the-Art, Noncontact Infrared, Laser, and Microwave Intelligent Sensors and Systems for Steel Mills 245
François Reizine, Bingji Li, and John Nauman

Chapter 23 Cold-Rolling Mill Vibration and Its Impact on Productivity and Product Quality 255
Tom Farley

Chapter 24 IMPOC©: An Online Material Properties Measurement System 265
Klaus Herrmann and Matthias Irle

Chapter 25 Technologies for the Prediction and Control of Microstructural Changes and Mechanical Properties 271

Kazuhiro Ohara

Chapter 26 Metallurgical, Modeling, and Software Engineering Issues in the Further Development of the Steel Mill Level 2 Models 277

Bingji Li and John Nauman

SECTION IV Strip Profile and Flatness Control

Chapter 27 Methods of Describing, Assessing, and Influencing Shape Deviations in Strips 287

Gert Mücke, Paul Dieter Pütz, and Frank Gorgels

Chapter 28 Local Shape Defects in Cold Rolling: Simulation, Causes Identification, and Reduction 299

Yuli Liu, Jian Fan, and Mike Levick

Chapter 29 Fundamentals of Online Flatness Measuring Devices 319

Fabio Miani and Paolo Patrizi

Chapter 30 Recent Developments in Strip-Profile Calculation 329

Arif S. Malik and Ramana V. Grandhi

Chapter 31 Hot Band Profile Irregularities Related to Thermal Contour of Work Rolls 341

Eugene Nikitenko

Chapter 32 Analysis of the Transverse Temperature Distribution in the Hot Strip Mill of a Compact Strip Production Plant 349

Jie Zhang, Lili Tian, Paolo Patrizi, and Fabio Miani

Chapter 33 Innovations in Shape Measurement and Control for Cold-Rolled Flat Strip Products 355

Mark E. Zipf

Index 367
